DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Saebo et al. (US Pub. 2001/0025113) in view of Reaney (US Pat. 6,414,171).

US'113 disclose the preparation of conjugated linoleic acids wherein linoleic acid ester is isomerized, saponified and neutralized resulting in the conjugated linoleic acid ester. As shown in example 4, the instant reaction parameters are used in the process of US'113. The claims differ from the reference by using phosphoric acid as the neutralizing agent.

However, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to use phosphoric acid. It is disclosed in US'171 that conventionally known neutralizing agents in this type of reactions is phosphoric acid, HCL, sulfuric acid and citric acid. Therefore to choose phosphoric acid as a neutralizing agent is considered an obvious modification.
